Main Research Interests

- **Robustness and Alignment** of Large Language Models (LLMs)
- LLMs for **Social Good**
- Dialogue System, Natural Language Generation

Research Highlights and Overview

- Published **10+** papers at the top-tier conferences (ACL, EMNLP, AACL).
- Google Scholar citations **710+**, h-index **13**, i10-index **13**.
- Conducted a series of research on **LLMs' robustness and alignment**, covering the following topics:
 - *Perturbation robustness.* [The preprint](#) investigates LLMs' bias and robustness in multiple choice evaluations.
 - *Out-of-distribution generalization.* [The ACL 2023 paper](#) improves small dialogue models' generalization with LLM-synthesized data.
 - *Adversarial attack and defense.* [The EMNLP 2022 paper](#) constructs queries at scale to trigger chatbots' self-contradictory behaviors; [The ACL 2023 paper](#) trains LLMs via contrastive learning to align generated texts with reward functions.
 - *Dialogue safety.* [The ACL 2022 paper](#) identifies typical categories of dialogue systems' safety failures. [The EMNLP 2022 paper](#) releases practical classifiers to detect Chinese LLMs' offensive language.
- Conducted a series of research on **LLMs for social good**, covering the following topics:
 - *Emotional support dialogue system.* [The ACL 2021 paper](#) proposes a practical emotional support framework for modern neural dialogue systems and makes the first step towards data-driven emotional support systems; [The ACL 2023 paper](#) leverages large-scale LLM-synthesized data to boost open-domain emotional support dialogue; Combining the two research work, we built a Chinese emotional support chatbot [Emohaa](#) (launched by Lingxin AI).
 - *Empathetic dialogue generation.* [The ACL 2021 paper](#) formulates a fine-grained conceptual framework to characterize empathy expression; [The AACL 2022 paper](#) and [the ACL 2023 paper](#) further enhance empathy expression with commonsense acquisition.
- Built a series of **popular NLP datasets**, including [ChID \(ACL 2019\)](#), [KDConv \(ACL 2020\)](#), [ESConv \(ACL 2021\)](#), [CDConv \(EMNLP 2022\)](#), [DiaSafety \(ACL 2022\)](#), and [COLD \(EMNLP 2022\)](#).
